

ALDTAN
Empowering Synergy

ALDTAN IT Profile

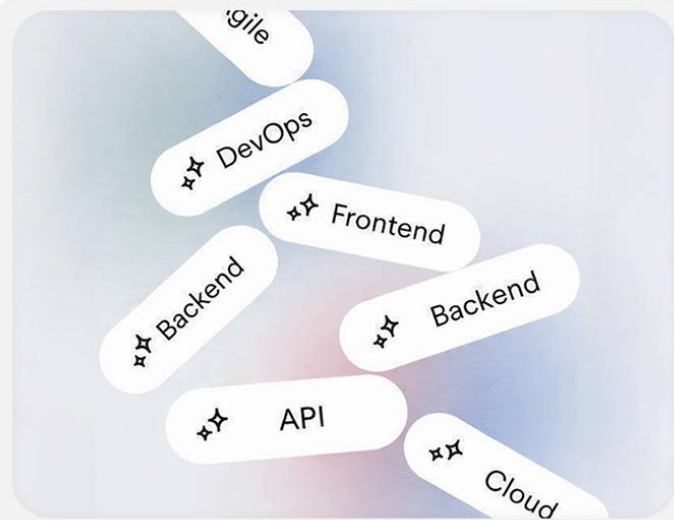

WHO WE ARE ?

Milestone achieved

**100
PROJECTS**

ALDTAN IT develops high-performance, any custom enterprise platforms tailored for complex operational environments.

We apply structured,
Engineering-driven methodologies
not off-the-shelf templates.

Our focus is mobility and operational intelligence systems that monitor, detect, automate, and optimize real-world operations.

We specialize in delivering versatile
Fleet Management Solutions
Any Industry. Any Scale.

**Production-proven
deployments** at provincial scale
demonstrate our capability to design and
operate mission-critical platforms.

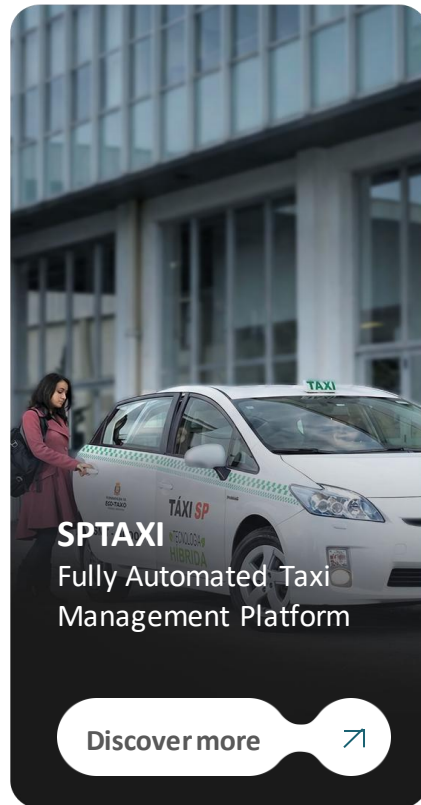

Production-Proven Platforms at International Scale

ALDTAN IT has successfully designed, deployed, and maintained large-scale, real-time operational platforms in live production environments.

And Future
Focast

The screenshot displays the Medlink Patients Management System interface. The main form includes fields for Patient Name, Age, and Patient No (12). It features sections for Diagnosis (ICD-10), Medical Tests, and Prescriptions/Drugs. The Prescription/Drugs section shows a table with columns for Drug Name, Dose, Frequency, and Qty. Below this, there are fields for Next Visit Date (2 Weeks, 3 Weeks) and Doctor's Notes. On the right side, there are panels for Search Patients, Patient Vitals (Blood Pressure: 118/76 mmHg, Heart Rate: 74 bpm), and Allergies & Alerts (Penicillin: HIGH, Peanuts: MEDIUM, Latex: LOW). A 'SAVE & PRINT RECORD' button is at the bottom right.

Why ALDTAN IT?

We specialize in delivering versatile **Fleet Management** Solutions **Any Industry. Any Scale.**
Production-scale real-time system deployment experience

Engineering-driven,
custom-built platform
design

Modular,
scalable,
AI-ready
architecture

End-to-end lifecycle delivery
(Design → Deployment → Support)

Rapid response and
long-term
operational
partnership

Our Applications & Platform Scalability

- **Intelligent operations**
platforms across fleet-driven industries
- **Smart mobility**
and logistics optimization systems
- **AI-powered** operational decision infrastructure
